

WE SUPPLY **ROBUST DOOR SOLUTIONS**, TO KEEP **UNINVITED GUESTS OUT** WHILE MEETING RETAILERS' NEED FOR **SPEED, SECURITY AND STATE-OF-THE-ART CONTROL UNITS**

HIGH SECURITY STEEL DOORS

HIGH-SPEED ROLLER DOORS

2 mm

2 m/s

At Door System we know that retailers need robust steel doors able to withstand the strains of heavy use during the day and keep out uninvited guests at night. This is why we have developed our "atom door". These doors are built from some of the strongest materials available on the market and are made with frames in 2.0 mm steel which makes them stronger and more secure.

We are aware that the retail trade operates at a high pace. For this reason we have developed a high-speed roller door with a roll speed of 2 m/s, so if you really wish to hit this door, you'll have to press hard on your accelerator. The built-in frequency converter ensures a gentle start and braking when the door moves up and down – to minimise maintenance costs. In other words, you will save both time and money on a high-speed roller door from Door System.

Solutions designed with retailers' needs in mind

Door System co-operates with some of the country's largest retail chains, including Kiwi, Kvickly, Netto, Rema1000, and Lidl. A co-operation which has led to the development of a number of modern, functional and hard-wearing door solutions – and always with the specific requirements of the business in mind: Fast-working solutions which will reduce staff waiting time, the importance of burglar protection and state-of-the-art control units featuring all the facilities needed by a modern company.

FIRE AND EMERGENCY EXIT DOORS

SAFETY FIRST

Door System supplies fire doors and emergency exit doors for the retail business, and keep updated with applicable regulations and requirements. We have often supplied solutions which combine fire doors with other doors like revolving doors, high-speed roller doors, cold store doors, or freezer room doors, and we are familiar with the issues raised when the same doorway has to meet requirements related to both its emergency exit and fire protection properties. Those are challenges we are familiar with and know how to resolve. At the same time, we have developed a super vision panel which offers a full 180-degree view from inside. It is a special kind of peephole which offers the employee a full view of anyone standing on the other side of the door, which significantly increases security for your staff.

MADE TO BE USED

ROBUSTNESS

In the retail business, the work speed is usually high, and at the same time, a retail outlet is a busy workplace with many people. As a result, large numbers of people and vehicles pass the company's doors each day, thus increasing the risk of collision and wear. At Door System we have developed a number of doors for the retail business with

robustness as the key feature. Our doors are made in the strongest materials on the market, and even fitted with extra reinforcements. The doors are supplied with frames in 2.0 mm stainless steel with a welded footplate on the door, making the doors extremely secure.

HOW IT ALL BEGAN...

CHAIN REACTION

We fully realise that wear and collisions cannot be completely avoided in the retail business, but wherever we can prevent these unfortunate impacts, we will. In order to minimise the amount of bumps and dents in the doors, we supply the door leaves in plate thicknesses up to 1.5 mm. In addition, our doors are fitted with stainless hinges which permit the door to open a full 180 degrees, thereby minimising the risk of collisions from the rear.

Door System was originally founded on the basis in the production of doors and gates for the food industry. However, following a number of enquiries from supermarket retail chains unable to source sufficiently robust steel doors, Door System and various retailers, including the Netto chain, set up a partnership to develop tailor-made doors with security and daily use as important design

parameters. Since then, we have been joined by other large supermarket and retail chains, and Door System now supplies steel doors and roller doors to the largest supermarket chains in the country.

WE CUSTOMISE YOUR DOOR

25 YEARS OF EXPERIENCE

Door System has more than 25 years of experience with the production of steel doors and gates and a philosophy for doing things more efficiently and intelligently. This is your guarantee that we are in just the right position to take up your challenge.

Quite often, a standard solution is simply not up to the task. Either because there is not room enough for it, or because the customer has a number of specific requirements regarding the door solution's properties. We have technicians with the skills to handle even the most unthinkable jobs. With very few exceptions.

It is important to us that the development process takes place in close co-operation with our customers. After all, they are the ones who will be using our solution. Solving the customer's problem is what ultimately creates value for the company.

Quite often, the problems faced by one customer are likely to give other customers trouble as well. Consequently, at Door System we make a point of enhancing our standard components with our customised solutions to ensure that the added value thus created will ultimately benefit all our customers.

DOCUMENTED QUALITY

100%

It may be a bit of a challenge to be a supplier to Door System, for we select only components that we consider absolutely top grade for our products. We realise that the retail business operates at a high pace, so everything must work flawlessly. The focus should be on the Total Cost of Ownership – as in the end, quality pays. Nothing is saved by using cheaper components, if this results in constant service being required on the door. We are particular about every single detail, so nothing leaves our factory until we are certain that it is 100% in order.

CUSTOMER SERVICE

24/7

Door System has a field force of skilled service fitters available throughout the country so we can respond quickly to urgent needs. We do not leave the site until our product has been correctly installed and runs properly. Door System offers full-scale service agreements covering all doors, gates and loading bays in your company. All service and repairs are made in accordance with all generally recognised regulations and standards. Of course, this includes service and repairs on products from other door suppliers.

COMPLETE DOCUMENTATION

IN-HOUSE SKILLS

Documentation on e.g. quality assurance, operation and maintenance will of course be provided to the customer in connection with the delivery. We comply with all statutory requirements under e.g. the CE labelling scheme and the Machine Directives.

In addition, we issue our own data sheets, drawings and installation instructions for all our doors/gates. Quite simply, we have all the required in-house technical skills to ensure 100% documentation of our solutions.

QUALITY PRODUCTS PAY THEMSELVES OFF IN THE LONG RUN

QUALITY PAYS

Door System develops and supplies door and gate solutions of the very highest quality. As a result, the price of our solutions may not always be the lowest on the market. However, the high reliability and significant savings on energy and maintenance costs offered by our products make them a very profitable investment over the length of their life cycle.

We develop and manufacture all our doors and gates at our own factory in Hasselager. Our skilled employees, with years of know-how and technical insight, are one of the main reasons for the high quality supplied by Door System. We have a field force of skilled service fitters available throughout the country and can offer full-scale service agreements.

Sophisticated doors and gates for industrial enterprises

Door System develops, manufactures and installs doors and gates for industrial companies throughout the Nordic region. In addition to specialised solutions for the pharmaceutical industry, we also supply cold store and freezer room doors and high-speed doors for the food industry and other industries.

Our products meet the highest demands made on installations in production environments with elevated requirements on hygiene. The key features which are

shared by all our door solutions are high quality and low maintenance. This is probably the reason why we have so many happy customers from so many different industries. Our door solutions can be found in every part of the industrial and commercial spectrum, from the off-shore and shipping industries to the retail business.

The companies benefitting from our products include slaughterhouses, pharmaceutical companies, dairies and retail chains.
